Danda, Srujana
DES 157

Audience Tasks:

Customize the layout of the screen by dragging around the modules to place as feels right to you.

Interact with each of the modules by hovering and clicking the buttons.

Add your own tasks by clicking the '+' button on the todo list and type them in. Then try to remove them.

Audience questions:

Is the functionality of any of the modules unclear?

Did you have trouble using any of the buttons?

Does any part of this project seem redundant or unnecessary?

How does the theme with the cork board and whiteboard make you feel? Would you change it to something else?

Does the hover function on the syllabus make it easy to use, or would you rather it just clicked and stayed until you clicked something else?
